

QUANTALOOOP
Technologies Inc.

The future of land investment and regeneration technology

Quantalooop is connecting a new generation of investors to **combat climate change** through the latest in land management and game design technology.

When it comes to *climate change*, we are **running out of time**.

THE PROBLEM

poor land management

Resulting in forest fires that destroy our homes and ruin our water

natural disasters

Massive drought, forest fires are on the rise

management technology

Incapable of managing our land effectively

lack of transparency

Resulting in distrusting investors and tax payers

lack of value

Carbon accounting and/or reversal isn't available

lack of stewardship

Accountability ambiguously linked to any supervising organization or body

Quantalooop

THE SOLUTION

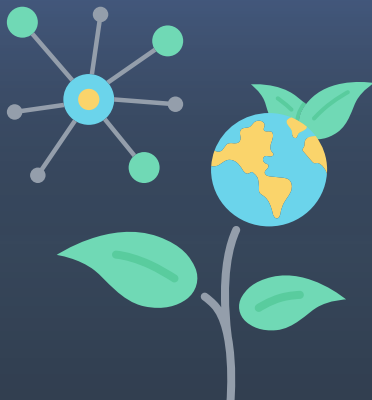

Quantalooop has created a land management and investment ecosystem that can reverse decades of damages and regenerate the planet.

awareness & value

Raise funds through green planet initiatives to improve management and reforestation

trust and transparency

Quantify and track carbon removal efforts with decentralized ledger technology

industry sectors

- Technology
- Forestry
- Carbon offset
- Stewardship
- Water
- Renewable energy
- Recycling & waste
- Fintech
- Gaming

state of the art
land management software

carbon offsetting
payment add-on

decentralized CO2
tracking

revenue models

- SaaS
- Licensing
- Network rev. share
- E-commerce
- Industry partners
- Grants & subsidies
- Virtual Goods/IAP
- Sponsorship
- Donations

FOR REGENERATION

Pilot Project

sequoias forest

NELDER GROVE, CA

project release: Spring 2018

size: ~11,735,880 M²

highlights: Forest restoration, fuel management, watershed & habitat protection and achieve maximum carbon sequestration of Sierra National Forest and private timberlands.

In Progress

sonny meadows

MARIPOSA COUNTY, CA

project release: Summer 2019

size: ~2,023,430 M²

BC Forest

VANCOUVER ISLAND, BC

project release: Fall 2019

size: TBD

Quantalooop empowers

merchant partners

'plug & play', zero-fee
carbon offset
payment add-on

- New source of revenue
- Substantiate business claims with trustworthy, real-time data
- Reinforce quality control
- Build trust in goods and supply chain

consumers

know how, what, where your
money goes when you buy

- Access verified product information you can trust
- Offset your personal carbon footprint
- Learn how and where to support ethical and green businesses
- Ensure environmental tax is going where it's suppose to go

the planet

sustainability for future
generations

- Improve air quality/control pollution
- Reduce waste in landfills
- Preserve soil
- Conserve water reserves
- Protect wildlife habitats
- Reverse climate change
- Support green initiatives
